

REYSHEIL ANNE DOROMAL

09310084204 | rdoromal30@gmail.com | github.com/wiishiwaashi
linkedin.com/in/reysheildoromal | https://ishiwishi-projects.vercel.app/

Education

Ateneo de Manila University – BS Computer Science

Expected: May 2029 | GPA: 3.97/4.0

Experience

Product Engineering Junior Mission Specialist

KadaKareer

June 2026 – Present

- Diagnose and troubleshoot software bugs within the core app to optimize platform stability and improve user experience
- Support the full software deployment life cycles (SDLCs) for ongoing initiatives
- Collaborate with teams to develop, test, and deploy new product features and projects

Software Development Intern

Boxhive Digital Solutions

June 2026 – Present

- Conduct technical feasibility and market research on RFIDs and NFCs for future product roadmaps
- Spearheaded end-to-end full-stack development of a client website, increasing visibility and range
- Execute rigorous beta testing on upcoming applications, identifying flaws and documenting feedback

Eskwelabs Innovation Fellow under Data Modeling Track

Eskwelabs

February 2026 – Present

- Engineered a scalable cybersecurity triage data generation engine that simulated real-world, high-throughput cybersecurity logs with 3,000+ records and 15+ attributes
- Implemented a statistical logit-based noise modeling (87.7% false positive rate) with configurable parameters for real-world simulation
- Built data pipelines to pinpoint bottlenecks and systemic triage errors, including disparities in off-hours True Positive rate
- Designed interactive dashboards via Tableau to analyze operational trends and improve efficiency

Natural Language Processing Research Intern

De La Salle University – Center for Language Technologies (CeLT)

June 2023 – July 2023

- Optimized high-volume textual data preprocessing pipelines by writing complex Regular Expressions to cut down on execution time by 20% across 100,000 text strings
- Developed Python scripts to ingest, clean, and classify data from 15,000+ social media posts for LLM fine-tuning
- Co-authored and presented a formal research project framework on semantic analysis and social media content to an advisory panel of academic experts, and was awarded Best Intern

Projects

Katha – The Network for Techwork | Full-stack Developer | May 2026

3rd place out of 150+ competing teams in the CodeKada Hackathon 2026

- Architected a B2B/B2C tech services marketplace (e.g. 3D printing, cad quotes, woodworking)
- Designed a PostgreSQL database schema to handle user roles, vendor listings, and transaction data
- Integrated LLM APIs to parse user needs and connect them with appropriate providers

Fuse | Full-stack Developer | June 2026

Top 10 finalist in the Information Systems Next Gen Startup Hackathon 2026

- Built a site that basically connects students to hackathons, possible hackathon teammates, and internships

Skills

- Languages: Python, Java, C++, TypeScript, JavaScript, SQL, HTML, CSS
- Frameworks and Libraries: React, FastAPI, Java Swing, Next.js
- Tools: Git, Railway, PostgreSQL, Vercel, Tableau
